

## ***If Life Originated By Chance, So Could God***

*June 14, 2014*

What is the origin of life on Earth?

The most intelligent scientists admit they do not really know for sure.

But all atheists think they do – all atheists have one and only one theory to explain the origin of life. Every single atheist claims that life began purely by chance and there is no God.

***But if life could originate just by chance,  
then God could also originate just by chance.***

The atheists' theory that life began by chance on Earth was disseminated worldwide by George Wald in his book "Origin of Life" when he wrote:

*"The important point is that since the origin of life belongs in the category of at least once phenomena, time is on its side. However improbable we regard this event, or any of the steps which it involves, given enough time it will almost certainly happen at-least-once. And for life as we know it, with its capacity for growth and reproduction, once may be enough."*

George Wald goes on to write:

*"Time is in fact the hero of the plot. The time with which we have to deal is of the order of two billion years. What we regard as impossible on the basis of human experience is meaningless here. Given so much time, the impossible*

*becomes possible, the possible probable, and the probable virtually certain. One has only to wait: time itself performs miracles."*

In other words, atheist George Wald and all other atheists postulate that life began by chance and the existence of life was accidental and there is no God or Creator.

But the truth is –

## **It is more likely for chance to produce God than Man**

The universe began with a Big Bang of pure energy.

The Big Bang is much more likely to produce a God that is pure energy than a human body that is comprised of trillions of biochemicals.

## **God Is More Survivable Than Man**

Once God is formed, God lives on forever because it is pure energy – energy cannot be destroyed, this is a law of physics. On the other hand, Man is unlikely to survive for long.

## **Humans Need Perfect Conditions To Survive**

Man needs perfect conditions or we will die. Man needs clean water and air, food, safe climates, etc. God does not need any of that.

God has to come into being only once to survive forever.

But Man needs many “by chance formations” in order to survive for even a short time.

George Wald was a professor at Harvard University so we guess he must have exhibited some intelligence – but he was obviously not intelligent enough to realize that his “the impossible becomes possible” theory backed him into a corner such that he would have to admit that God was also possible.

George Wald suffered from what we call “Atheism Blindness” which is a mental deficiency. That is why he never thought of the fact that if Man could come about by chance, so could God.

## **God Is More Likely Than Man**

Atheists claim that over the course of billions of years, “the impossible becomes possible.” We say the possible includes God.

In fact, God is much more likely than man because GOD HAD more than NINE BILLION EXTRA YEARS to be formed by chance, whereas life on Earth only had less than 4.6 billion years.

Here is why God had nine billion extra years to come into being:

Scientists think the universe is 13.8 billion years old, and our Sun is only 4.6 billion years old.

This means that God had over 9 billion years to develop itself before our Sun was even born.

Atheist Harvard professor George Wald, the revered leader of modern atheist thinking, wrote that in two billion years, anything that can happen will happen.

God had 9 billion years to be formed before Earth even existed.

Therefore God is a certainty.

**GOD IS A CERTAINTY**

**GOD IS MORE LIKELY THAN MAN,**

**BY ANY MEASURE**
